EDUCATION

East China University of Science and Technology 华东理工大学

Bachelor of Eng in Software Engineering 软件工程-工学学士 *May 2022*

- Relevant Coursework: Artificial Intelligence, Data Structures, Operating Systems, Compilers, Computer Networks, Database Systems, Computer Graphics.

MITx MicroMasters Program Credential in Statistics and Data Science

MITx on edX *February 2022 – April 2025*

- Relevant Coursework: Probability, Fundamentals of Statistics, Machine Learning, Data Analysis: Statistical Modeling and Computation Applications
- Program Letter: https://micromasters.mit.edu/letter/program/5b530eed-ee78-45ba-8bcb-ba82de9cbb9b

EXPERIENCE

Naive Systems 那一科技

Software Engineer (very early member of the startup)

- Tech Stack: Clang, Clang Static Analyzer, Infer, Cppcheck, Semgrep. *September 2021 – May 2023*
- Designed and implemented C/C++ static analysis systems from scratch, for code security and compliance.
- Implemented hundreds of static code checkers for MISRA C/C++, AUTOSAR C++ compliance and CWE vulnerable patterns. Partly open-sourced: https://github.com/naivesystems/analyze.
- Led the design and implementation of a JVM 11 compliant virtual machine capable of checking for common concurrency issues (deadlocks, race conditions)
- Develop static analysis tools for multiple languages such as Go, Python, Java, JavaScript, etc., perform static analysis on large repositories on GitHub, test the false positive and false negative rates of analysis tools, and maintain the defect database.

Feysh Technology 蜚语科技

C++ Developer Engineer *November 2023 – May 2024*

- Developed and tested static analysis tools based on Clang and Clang Static Analyzer for MISRA C/C++ compliance..
- Developed automatic test generation tools to improve the CI and code review processes and increase code test coverage.

Memory Connected (Memect.co) 文因互联

Machine Learning Engineer *March 2025 – Now*

- Maintaining LLM training and inference infrastructures based on veRL, vLLM, SGLang.
- Training layout analysis and table recognition models to improve OCR accuracy and automatic document understanding.
- Developing agentic wiki building tools for hundreds of TBs of documents.
- Maintaining benchmarking tools to test the performance of internal models on different customers' data and compare them with public models.

SKILLS & INTERESTS

Programming Languages: C, C++, Python, Go, SQL. • Tools: Microsoft Excel, GitHub, AWS.

Languages: English (Fluent) • Chinese (Native) • French/Spanish/Cantonese/Japanese (Finished Duolingo Courses)

Laboratory: Experience with data mining, modeling, A/B testing, and predictive analysis.

Interests: Passion for AI coding tools development/hunting. • Enthusiast of detective fiction and TV series.
